Randolph, VT 05060-0421

PRODUCT CARE FOR YOUR NEW IPE PRODUCTS

Your IPE products must be treated prior to being installed. The entire product has been treated before shipping with Anchor Seal Wax to prevent against checking or cracking. After 1-2 weeks the wax will wear off and you should be able to paint or stain the caps.

You may order the caps un-waxed, however if you do they will NOT be covered under warranty and will not be returnable or refundable.

Treat the entire product, top, bottom, all side, inside and out! Apply a heavy coat, and wipe off excess with rag. Repeat this process at least one more time after first coat is completely dry.

The following sealers are recommended:

- Penofin for hardwood decks
- Waterlox Marine Sealer and Finish
- Sikkens Cetol
- Cabot Australian Timber Oil

These IPE products **WILL NOT BE COVERED UNDER WARRANTY** if they are not treated prior to being installed

Thank you,
Nantucket Post Cap
