PRODUCT CARE FOR YOUR NEW MAHOGANY POST CAPS

Your Mahogany post caps must be treated prior to being installed on the post. These Mahogany post caps **HAVE BEEN** treated with Anchor Seal Wax to prevent against cracking and checking.

You may order the caps un-waxed, however if you do they will **NOT** be covered under warranty and will not be returnable or refundable.

Mahogany is a tropical wood popular for building because of its durability, hardness, workability and insect resistance and relatively straight grain. The color of Mahogany is a dark red-brown which darkens as it ages. When polished, Mahogany has a striking sheen.

Stain outdoor wood periodically. After a cleaning is a good time to stain the wood to help seal it and preserve its natural qualities.

Find a good stain such as Messmer's UV Plus and apply the stain according to the product's instructions.

The following is recommended:

- Natural Wood Deck Sealing: www.CedarCideStore.com
- Non Toxic, effective solution to keep wood structures in good shape!
- Messmer's Wood Finishes: www.messmers.com
- Premium finishes for decks, siding, log homes, fencing and more.

These caps **WILL NOT BE COVERED UNDER WARRANTY** if they are not treated prior to being installed on the posts.

Thank you,
Nantucket Post Cap
